उपसभापति: आप तो स्वयं डिप्टी चेयरमैन थीं, मैं क्या करूं? (*Interruptions*)... Is it possible to take it up after Question Hour? (*Interruptions*)... आप बैठिए न। ...(**व्यवधान**)...

श्री मोती लाल वोरा: जीरो आँवर में हम लोगों ने भी दिया है। ...(**व्यवधान**)...

DR. (SHRIMATI) NAJMA A. HEPTULLA: There was lack of instructions. (*Interruptions*)... Sir, what is this? (*Interruptions*).... When we demand a discussion, you don't allow it. (*Interruptions*)...

MR. DEPUTY CHAIRMAN: If the hon. Members desire that this matter should be discussed in the House, nothing prevents them from giving notice for Half-an-Hour Discussion and this question can be discussed in the House. (*Interruptions*)...

DR. (SHRIMATI) NAJMA A. HEPTULLA: Half-an-hour is not enough.

WRITTEN ANSWERS TO STARRED QUESTIONS

Allocation for rural water supply scheme

144. PROF. M.M. AGARWAL: Will the Minister of RURAL DEVELOPMENT be pleased to state:

(a) the details of the amount allocated to the States under the rural water supply scheme during the last three years and till date, State-wise;

(b) the details of the amount utilized by the States during this period; and

(c) the present status of the rural water supply scheme in the country?

THE MINISTER OF RURAL DEVELOPMENT (SHRI RAGHUVANSH PRASAD SINGH): (a) and (b) Rural drinking water is a State subject. The Central Government, however, supplements the efforts of the State Governments in providing drinking water facilities in rural habitations by

rendering financial assistance under a Centrally sponsored scheme namely Accelerated Rural Water Supply Programme (ARWSP). The State-wise details of the amount allocated, releases made and expenditure reported by the States during the last three years and in the current year are at Statements I to IV. (*See* below)

(c) Rural Drinking Water is one of the components of Bharat Nirman, which has been conceived as a plan to build rural infrastructure in a 4-year period-2005-06 to 2008-09. The plan of the Government under Bharat Nirman for rural drinking water supply is to fully covery 55,067 uncovered habitations. In addition, habitations, which have slipped back from full coverage to partial coverage due to failure of systems or sources, and habitations, which have quality problems, will also be covered. During the current year (2005-06), 54,890 rural habitations are reported to have been covered till 31st January, 2006 which include uncovered, slipped back and quality affected habitations, as against the annual target of 56,270 rural habitations.

Upto 20% of the Annual ARWSP funds may be allocated for Swajaldhara scheme. These funds are allocated to the States every year. The States then make district wise allocation and inform the Department of Drinking Water Supply, which releases the instalments accordingly.

To institutionalize community based water quality monitoring and surveillance system in the country, Government of India has introduced the National Rural Drinking Water Quality Monitoring and Surveillance Programme in February 2006. The total estimated Government of India share for this programme for the remaining 10th Five Year Plan period would be Rs. 269.88 crores. An amount of Rs. 57.84 crore has been released to the States during the current financial year for implementation of the programme.

For capacity building of various stakeholders working in water supply and sanitation sectors as well as for creating awareness amongst the people on these issues, Communication and Capacity Development Units (CCDU) have been sanctioned in 23 States so far with an outlay of Rs. 23.82 crore.

Statement-I

State-wise details of the allocation, releases and utilization of funds under rural water supply schemes during the year 2002-2003.
